The United States sent about 60 million fewer bushels of grain and grain products abroad in the period July through October than in 1949, the Production and Marketing Administration reports.

PMA

The index of prices received by farmers rose 8 points from mid-October to mid-November as a result of generally higher prices for practically all commodities; the main exceptions were fruits and hogs. The index is now 276 percent of the 1910-14 average, the Bureau of Agricultural Economics reports.

PMA

Performance Reports covering conservation practices carried out under the 1950 Agricultural Conservation Program must be filed with the county PMA committee on or before January 15, 1951 in order for the practices to be eligible for payment, according to J. E. Kasper, Chairman, North Dakota PMA Committee.

PMA

The Agricultural Conservation Program stimulates the carrying out of additional conservation work for which the farmer receives no assistance under the program.

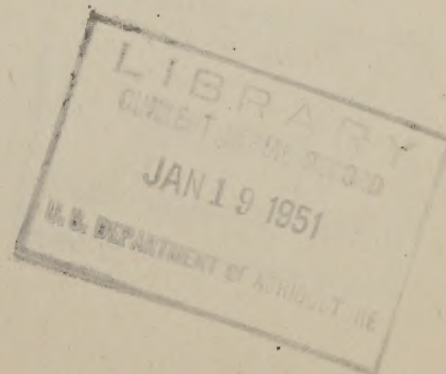

PMA

For the Nation as a whole, farmers through October had under price support about 189 million bushels of 1950 crop wheat, barley, oats, rye, flaxseed, corn, and grain sorghums. This was a little more than half the comparable 1949 total of 354 million bushels, the Production and Marketing Administration reports.

PMA

The stubble or stalks left after the crop is harvested often provide the best type of materials with which to build a better soil. These crop residue materials worked into the surface soil help to hold the soil and protect it against wind erosion, the Production and Marketing Administration emphasizes.

The U. S. Department of Agriculture has purchased 5 million 790 thousand pounds of smoked pork to be distributed to schools throughout the nation for use in school lunch programs.

PMA

Farmers have increased output twice as much during the last two decades as the number of consumers has increased, according to the Bureau of Agricultural Economics.

PMA

Current figures indicate there are about 3 million farmers cooperating in the Agricultural Conservation Program, while there are 150 million people in cities and towns depending on the conservation job they do.

PMA

The world wheat crop is presently estimated at 6.4 billion bushels, except for 1948, the largest crop reported since 1938, the Production and Marketing Administration reports.

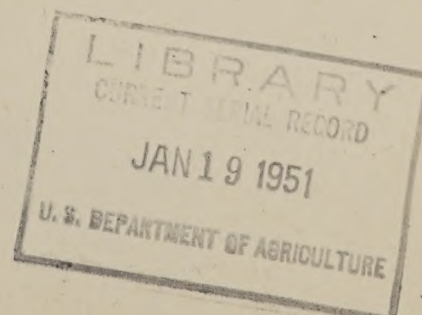

PMA

Farm output per man-hour has kept pace with that of industry for the last three decades, says a recent study of the Department of Agriculture. This results from more and better labor-saving machines, other capital investments, and improved know-how of workers, the Production and Marketing Administration reports.

PMA

The Production and Marketing Administration of the U. S. Department of Agriculture has announced a program to purchase wool for the Department of the Army. This program is to procure approximately 30 million pounds of raw wool, clean basis, for a part of the Armed Services emergency reserve requirements.

December 21, 1950

According to developments during November, the volume of lamb feeding during the coming winter and spring months will be smaller than last year, the Bureau of Agricultural Economics reports.

PMA

Nearly half of the Nation's farmers are using the Agricultural Conservation Program to help meet their conservation problems. The land operated by these farmers makes up more than three-fourths of all the land in farms.

PMA

Wool production in the U. S. in 1950 will hit an all time low of 254 million pounds, the Production and Marketing Administration reports.

PMA

The Agricultural Conservation Program is open to all farmers and is accessible to every farmer. It is a direct, effective, and democratic means of stimulating conservation.

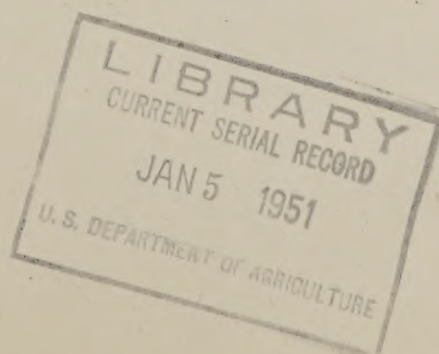

PMA

World commercial fertilizer production reached an all-time high in the year ending June 30, the Food and Agriculture Organization of the United Nations reports.

PMA

Volume of cattle feeding during the coming winter and spring will be nearly as high as last year. Movement of stocker and feeder cattle into Corn Belt States was accelerated during November to establish a new record for the month, the Bureau of Agricultural Economics reports.

December 28, 1950

Some notable accomplishments of permanent farm improvements carried out under the Agricultural Conservation Program in North Dakota prior to 1950 include the construction of 14,372 livestock water dams, 2,048 new wells for better distribution of livestock, 905 springs or seeps and the planting of 23,886 acres of trees.

PMA

Loans to operators of family-type farms are strengthening and enriching the Nation's agricultural resources, the Farmers Home Administration said in its annual report for fiscal year 1950, released by the U. S. Department of Agriculture.

PMA

The 1950 pig crop totaled 100.7 million head, an increase of 5 percent over last year, the Bureau of Agricultural Economics reports.

PMA

Crop production in 1950 was the third largest of record. This output exceeds the average of the previous 8 years, the most productive period in American agriculture, the Department of Agriculture reports.

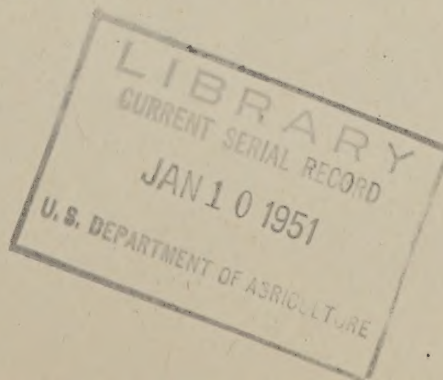

PMA

Foods listed as "plentiful" for January, 1951 by the U. S. Department of Agriculture include: Pork, potatoes, cottage cheese, broilers, peanut butter, frozen fish fillets, apples, oranges, grapefruit, cranberries, honey, onions and sauerkraut.

PMA

More production, and less of materials, machines, and manpower to turn out that production, was the way agriculture's defense job was summed up at the National Conference of the Production and Marketing Administration in Chicago recently.
